

NAVANTIA will enhance the capability of Royal Thai Navy amphibious ship

Bangkok, 10th April 2025.- Navantia will support the Royal Thai Navy (RTN) in its project to enhance the capability of the landing platform dock (LPD) HTMS Chang (792).

The contract includes the provision and integration of the combat management system (CMS), surveillance system, fire control system (FCS), weapon system, gyros, and other related technologies. Navantia will equip the HTMS Chang with some of its most cutting-edge naval systems, including the CATIZ CMS and DORNA FCS, ensuring the RTN benefits from the most advanced capabilities available.

Navantia has a longstanding relationship with the RTN, having previously supplied the HTMS Chakri Naruebet (911), the flagship of the RTN fleet. This new contract not only strengthens the ties between Navantia and the RTN but also boosts local skills and industry through collaboration with the Mahidol Dockyard. This partnership paves the way for future projects and further cooperation.

This contract underscores Navantia's excellence in naval defense systems, modernization projects, and high-value-added services. It reaffirms Navantia's commitment to delivering state-of-the-art solutions and supporting the strategic needs of its partners.

About Navantia:

With a history of over 300 years linked to the construction of ships for the Navy, Navantia is a public technology company that is strategic for Spain's defense. Its areas of specialization range from naval construction (surface and submarine) to the design and integration of high-tech systems and lifecycle support and high value-added services. Additionally, under its Navantia Seanergies brand, it is a global provider for the development of offshore wind energy and other green energies such as hydrogen. Navantia directly employs around 4,000 people in Spain, mainly at its locations in Ferrol and Fene (A Coruña), Puerto Real, San Fernando, Cádiz and Rota (Cádiz), Cartagena (Region of Murcia), and Madrid.

Committed to building a secure and sustainable future through technological excellence and industrial collaboration, Navantia has contracts with governments and companies worldwide and ties with universities and technological and academic centers. Due to its social responsibility as a public company and as a driving force for an entire industrial ecosystem, it contributes to sustainability and innovation with its daily commitment to people and the planet, with responsible practices from the labor, environmental, and viable economic and technological development perspectives regionally, nationally, and internationally. It is 100% owned by the Spanish Society of Industrial Participations (SEPI, attached to the Ministry of Finance and Public Function of Spain).
